# \$100 Billion Market Opportunity

Innovations in medicine are shifting the perspective of mental illness and addiction.

Despite commercial success of conventional medications to treat mental illness and addiction, many leading experts have been disappointed in their efficacy.

1 in 5 Canadians experience a mental illness or addiction problem every year, and by the age of 49, 1 in 2 have—or have had—a mental illness.<sup>1</sup>

Mental illness is the leading cause of disability in Canada, and are more likely to cause people to die prematurely than the general population, cutting 10-20 years from a person’s life expectancy.<sup>2,3,4,5</sup>
